

Amendments to the Specification:

Amend the paragraph between page 17, line 27 and page 18, line 5 as follows:

D 1
In addition, the sound generation means [forms] forming part of notifying means is operated to notify the game player of predetermined notifying information in notifying states including a current notifying state and subsequent notifying states following said current notifying state, while the game player is enjoying games including a current game and subsequent games following said current game. In the embodiment, the notifying means outputs any one of five game sounds: game sound 1, game sound 2, game sound 3, game sound 4 and game sound 5 during the regular game operation. One game sound is selected from the game sounds 1 to 5 through a lottery operation run after the input time of the start lever 15 (see Fig. 9(d)) by subsequent notifying state determining means, which will be described hereinafter. Then the notifying means is operated to output the selected game sound (see Fig. 9(a)). More specifically, the game sound to be sounded in the subsequent game is selected in advance on the basis of the game sound sounded in the current game. The subsequent notifying state determining means is constituted by the micom 30.
